ISSUE 8

SEPTEMBER 2011

## ***TEKNOS PROVIDING SOLUTIONS TO TODAY'S CHALLENGES***

Since the introduction of the Teknos Coating brand into the Irish market in June 2011 the results and response to their coatings has been very encouraging to say the least. Complete Coatings have promoted and trialed the products in many and various sectors of Irish industry such as the pharmaceutical, food processing flooring and agri-machinery to mention but a few. In all cases the transitions has been successful and have mostly exceeded our expectations.

In a questionnaire we sent out to quality users the four most common comments which immediately sprung from the survey were:

- Quality of sheen
- Drying times
- Coverage
- Range of coating solutions

### **Machinery Manufacturer:**

Indeed we highlighted the above in a much more transparent way with a machinery manufacturer here in Ireland, having successfully trialed a one coat two pack system for them. The results were outstanding in terms of benefits to the client. Such as the following:

- Cost efficiency with regards to less labour and energy costs.
- Fast throughput and drying, typically within 2 hours
- Low VOC emissions due to high solid content

### **Food Processing & Healthcare Industry:**

With an outstanding food industry coatings record, Teknos are supplying us with coatings which reach the highest standards required within the food processing industry for compliance with regards to coatings non taints and anti-microbial properties. Even with recent testing the coating receiving daily hot power washing and chemical scrub it has continued to stay on the walls and resist the chemicals. These products have sprung from a lot of R&D development work by Teknos in the nuclear power industry across europe.

Having extensively used Teknos over the last three months the results look very satisfactory from a user point of view. Combining Teknos products with our other suppliers we now can offer the complete range of coatings from Marine to Powder, from Wood to Metal and other types of paint that are not even fully mentioned here.
